Пример

Task 1. Imagine that you are preparing a project with your friend. You have found some interesting material for the presentation and you want to read this text to your friend. You have 1.5 minutes to read the text silently, then be ready to read it out loud. You will not have more than 1.5 minutes to read it.

There is a legend that in the beginning there was only one language in the world. People were so proud of their accomplishments that they believed they could build a tower so tall that they could reach heaven. Their god was so upset with their efforts that he decided to scatter them across the globe to prevent them from trying it again. He then confused them by making them speak different languages. It is for this reason that people must now constantly try to overcome language barriers. In reality, European languages can be traced back to one language - Sanskrit.

One similarity is clearly visible in the Sanskrit word for brother. It is nearly the same word in Sanskrit as it is in Russian.

There have been numerous attempts to create a single universal language. Between 1880 and 1907 there were 53 attempts. However, apart from mathematics, English has become the only universal language.
